

Tech Chips

Tech Chips

Tech helps run our lives.
But what runs our tech?

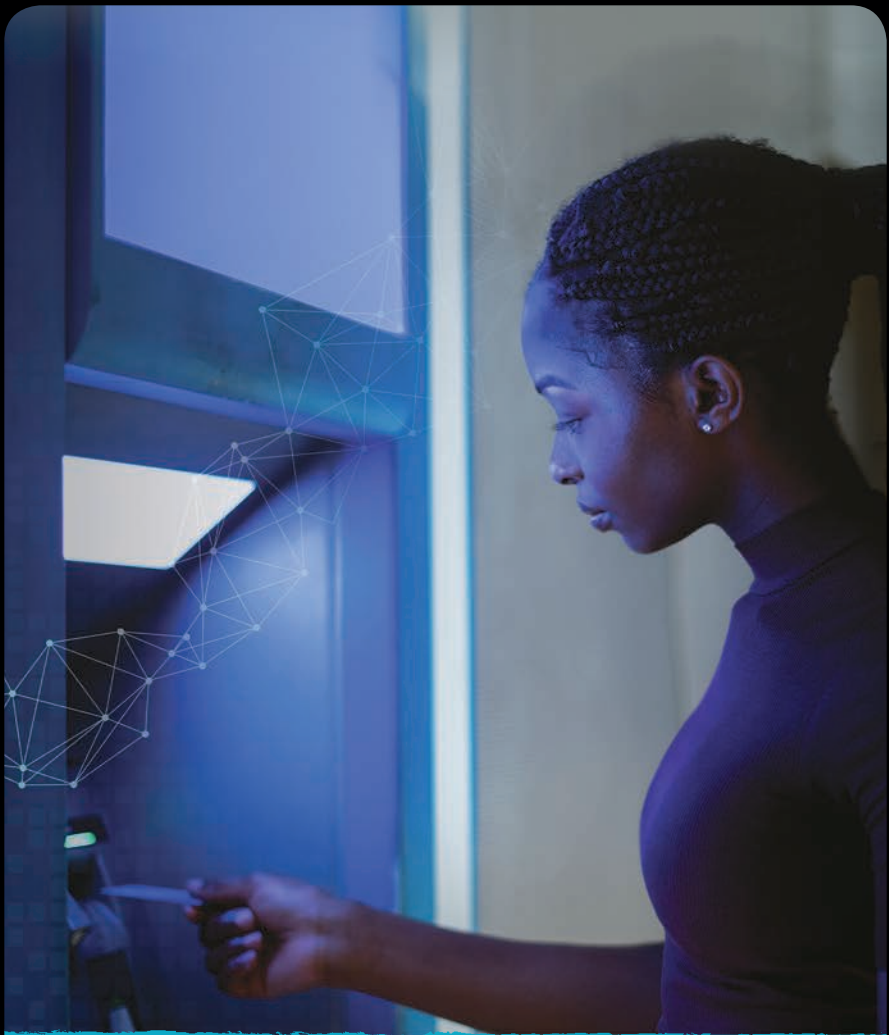

The **answer** is small.
You could fit it on your thumb.
It is a chip.

Think of a phone.
A chip sends your texts.

Open a fridge.
It stays cold thanks to a chip.

Go to an ATM.
A chip keeps track of your cash.

Chips play songs.
They help drive buses.
How can chips do so much?
Take a close look.
